

**REMARKS**

Claim 1 has been amended to clarify the subject matter of the invention. Support for the claim amendment provided herein can be found in the claims and specification of the original application. No new matter is believed to have been added to the application. Reconsideration of the claims, in view of this amendment, is respectfully requested.

Specifically, the recitation of three separate refrigeration circuits has been amended to recite three separate and closed refrigeration circuits. As described in the previously submitted response, none of the references teaches or suggests separate and closed circuits where fluid does not pass between the individual circuits. In addition, the functional language recited in claim 1 has been replaced with language directed to the flow of the refrigerant.

CONCLUSION

Applicants respectfully requests entry of the amendments and consideration of the remarks herein. Examiner is invited to contact the undersigned if deemed helpful to facilitate prosecution of the application to issuance.

No fee is believed due; however, the Commissioner is hereby authorized to charge any additional fees which may be required, or credit any overpayment to Deposit Account No. 14-0629.

Respectfully submitted,

BALLARD SPAHR LLP
